Anatomy, Physiology and Coding: Cardiovascular, Respiratory, Lymphatic and Endocrine Systems

Build a better you

Skill-focused

Self-paced

Job-ready

**This course was created with the National
Healthcareer Association (NHA) and includes
course material directly from NHA.**

Required materials

We recommend having the required materials on hand before starting this course. You will not be able to gain the full benefit of this course without these coding manuals, and you'll need them if you plan to take NHA's Certified Billing & Coding Specialist, (CBCS), certification exam. Course materials are not included in course price.

- ICD-10-CM 2022: The Complete Official Codebook (ICD-10-CM the Complete Official Codebook)
- HCPCS 2022 Level II Professional Edition (HCPCS Level II (American Medical Assn))
- CPT 2022 Professional Edition (CPT / Current Procedural Terminology (Professional Edition))

Course overview

Build your knowledge of anatomy, physiology and key body systems – this course focuses on the Cardiovascular, Respiratory, Endocrine & Lymphatic systems. Learn medical terms and acronyms to bill and code for maximum reimbursement. Practice your coding for diagnoses, tests, procedures and treatments related to this body system.

Skills you'll learn

- Locate relevant information from patient medical records
- Resolve medical record discrepancies and collaborate with providers for clarification
- Determine appropriate responses and actions to claim rejections
- Ensure all medical care and procedures are properly captured and coded for optimal reimbursement

Key topics

- Anatomy and physiology for Cardiovascular, Respiratory, Endocrine & Lymphatic systems
- Medical terms and acronyms within medical records
- Resolving discrepancies and processing claims

Course outline

1 of 2

Course Introduction

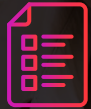

- Getting Started
- Course Welcome

Module 1 - Anatomy and Physiology for Coding the Cardiovascular System

- Introduction to the Cardiovascular System
- Basic Anatomy of the Heart and Heart Disease
- Cardiovascular System Key Concepts
- Cardiovascular System Anatomy and Coding Knowledge Check
- Cardiovascular System Skills Assessment

Module 2 - Anatomy and Physiology for Coding the Respiratory System

- Introduction to the Respiratory System
- Basic Anatomy and Functions of Respiration
- Respiratory System Key Concepts and Diseases
- Respiratory System Anatomy and Coding Knowledge Check
- Respiratory System Skills Assessment

Course outline 2 of 2

Module 3 - Anatomy and Physiology for Coding the Endocrine System

- Introduction to the Endocrine System
- Basic Anatomy and Diseases of the Endocrine System
- Glands, Hormones, and Endocrine Disease Key Concepts
- Endocrine System Anatomy and Coding Knowledge Check
- Endocrine System Skills Assessment

Module 4 - Anatomy and Physiology for Coding the Lymphatic System

- Introduction to the Lymphatic and Immune Systems
- Basic Anatomy of the Lymphatic System and Related Issues
- Immune System Key Concepts
- Lymphatic System Anatomy and Coding Knowledge Check
- Lymphatic System Skills Assessment
