# Anatomy, Physiology and Coding: Gastrointestinal, Integumentary, Reproductive and Urinary Systems

**Build a better you**

**Skill-focused**

**Self-paced**

**Job-ready**

**This course was created with the National  
Healthcareer Association (NHA) and includes  
course material directly from NHA.**

## Required materials

We recommend having the following required materials on hand before starting this course. You will not be able to gain the full benefit of this course without these coding manuals, and you'll need them if you plan to take NHA's Certified Billing & Coding Specialist, (CBCS), certification exam. The following materials are not included in the purchase price and must be obtained separately.

- ICD-10-CM 2022: The Complete Official Codebook (ICD-10-CM the Complete Official Codebook)
- HCPCS 2022 Level II Professional Edition (HCPCS Level II (American Medical Assn))
- CPT 2022 Professional Edition (CPT / Current Procedural Terminology (Professional Edition))

# Course overview

Build your knowledge of anatomy, physiology and key body systems – this course focuses on the Gastrointestinal, Integumentary, Reproductive and Urinary systems. Learn medical terms and acronyms to bill and code for maximum reimbursement. Practice your coding for diagnoses, tests, procedures and treatments related to this body system.

## Skills you'll learn

- Locate relevant information from patient medical records
- Resolve medical record discrepancies and collaborate with providers for clarification
- Determine appropriate responses and actions to claim rejections
- Ensure all medical care and procedures are properly captured and coded for optimal reimbursement

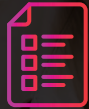

## Key topics

- Anatomy and physiology for Gastrointestinal, Integumentary, Reproductive, and Urinary systems
- Medical terms and acronyms within medical records
- Resolving discrepancies and processing claims

# Course outline

## 1 of 2

### **Course Introduction**

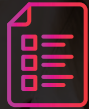

- Getting Started
- Course Welcome

### **Module 1 - Anatomy and Physiology for Coding the Gastrointestinal System**

- Introduction to the Gastrointestinal System
- Basic Anatomy of the Digestive System and the Gut
- Digestive Disorders, Disease, and Anatomy Key Concepts
- Gastrointestinal System Anatomy and Coding Knowledge Check
- Gastrointestinal System Skills Assessment

### **Module 2 - Anatomy and Physiology for Coding the Urinary System**

- Introduction to the Urinary System
- Basic Anatomy of the Urinary System
- Urinary System Disease and Anatomy Key Concepts
- Urinary System Anatomy and Coding Knowledge Check
- Urinary System Skills Assessment

## Course outline

### 2 of 2

#### **Module 3 - Anatomy and Physiology for Coding the Integumentary System**

- Introduction to the Integumentary System
- Diseases of the Integumentary System
- Integumentary System Disorders and Anatomy Key Concepts
- Integumentary System Anatomy and Coding Knowledge Check
- Integumentary System Skills Assessment

#### **Module 4 - Anatomy and Physiology for Coding the Reproductive System**

- Introduction to the Reproductive System
- Basic Anatomy and Cancers of the Reproductive System
- Reproductive Disorders, Disease, and Anatomy Key Concepts
- Reproductive System Anatomy and Coding Knowledge Check
- Reproductive System Skills Assessment
